

FOR IMMEDIATE RELEASE

**ZEBRA IMAGING WINS “BEST USE OF TECHNOLOGY” AWARD AT THE  
DEFENSE INTELLIGENCE AGENCY CIO-SPONSORED DEPARTMENT OF  
DEFENSE INTELLIGENCE INFORMATION SYSTEM WORLDWIDE  
CONFERENCE 2007**

Chicago, IL - May 2, 2007 – Out of 216 exhibitors at the 2007 Department of Defense Intelligence Information System (DoDIIS) Worldwide Conference, Zebra Imaging of Austin, Texas was presented with the “Best Use of Technology” award as voted by conference attendees today.

This years DoDIIS conference was a three day event with an estimated attendance of over 1,500 attendees from government, military, and contractor personnel representing Information Systems and Information Technology markets from around the world. The theme of the event was “Leveraging Technology to Enable the Warfighter”. Topics and exhibits highlighted advanced methods currently deployed and technological solutions designed to support the needs of the warfighter.

“This is truly a watershed event and a significant achievement to be recognized in this fashion by such a prestigious community.” said Dr. James Gardner, Zebra Imaging’s Vice President Business Development. “It is reflective of Zebra’s commitment to providing high quality products to the Department of Defense and Intelligence community.”

**About Zebra Imaging**

Zebra Imaging provides holograms and displays, 3D imaging systems design, development and engineering services to government and commercial clients in defense and intelligence, industrial design, and petroleum exploration. To date, it is the only company that offers large-scale, autostereoscopic, full-parallax (omni-directional 3D viewing), full-color displays for 3D digital imagery.
